Risk, Complexity & Compliance in Outsourcing, 10-12 June 2015, Warsaw Poland!

PCMG remains committed to maintain the relevance of the Annual Conference to all delegates. Quality of content remains the key, but PCMG also recognizes the need to maintain the conference's unique format as well as introducing innovations in interaction with delegates.

The Conference Steering Committee comprising of both Pharma and Provider members including EUCROF has been working hard to develop three main segments.....

Er.....what high-visibility jacket?

2. COMPLEXITY.....

Think clinical development is complex? Airports, stadiums, tunnels....We look outside the window and see massive, complex projects in construction and other areas to select a case study that highlights the approach of other sectors to managing complexity and also review the fundamentals of the concept.

3. COMPLIANCE

Ignorance is no defence. What is it and how can we comply with international requirements? This section will determine the fundamentals of compliance from Pharma, CRO and R&D perspectives.

1. RISK

Outsourcing clinical trials is a high risk pursuit of high quality data. What practical measures can be taken to reduce that exposure?

Risk Based Monitoring – does it really work for sites and sponsors? What are the site and regulatory perspectives in implementation, and are CROs *really* willing and able to use or is it an awkward financial risk?

4. All the elements unique to PCMG

- ✓ No exhibition hall
- ✓ 2:1 provider/pharma ratio
- ✓ PCMG managed content
- ✓ Professional interaction throughout the event
- ✓ Pharma delegate fee included in Annual Membership

PCMG Annual Membership Fee remains outstanding value @ £450+ VAT

2015 subscription now open to enable access to workshops, standards of practice, webinars, and the PCMG member Q&A network...as well as registration for the conference!
